

H. ASSISTANCE TO OUTSIDE USERS OF ATLAS

E. F. Moore

This year has seen a continuation of a large number of outside Users of ATLAS, in part due to the very active, successful program utilizing Gammasphere, which ran until mid-March 2000. However, there has been considerable outside User involvement in other experimental programs described elsewhere in this report. Outside Users were involved in about 95% of all experiments performed in fiscal year 2000. Frank Moore has been available in a user liaison capacity to handle the scheduling of ATLAS experiments, provide assistance in experiment proposal submission matters, and help facilitate the effective performance of research at ATLAS by outside scientists. In addition, a large portion of the Heavy-Ion in-house scientific staff has spent time in experiment setup, preparation, and assistance for the many different Gammasphere experiments.

The Program Advisory Committee met three times during the 2000 fiscal year. Program Advisory Committee meetings were held on October 11-12, 1999, March 3-4, 2000 and September 22, 2000 to recommend experiments for running time at ATLAS. In FY 2000 the Program Advisory Committee members were:

Birger Back (Sep-00)	Argonne National Laboratory
David Balamuth (Oct-99, Mar-00)	University of Pennsylvania
James Beene (Mar-00, Sep-00)	Oak Ridge National Laboratory
Jolie Cizewski (Sep-00)	Rutgers University
Stuart Freedman (Sep-00)	University of California
Bernard Haas (Oct-99, Mar-00)	Institut de Recherches Subatomiques (Strasbourg)
I-Y. Lee (Oct-99, chair)	Lawrence Berkley Laboratory
David Morrissey (Sep-00)	Michigan State University
Witek Nazarewicz (Oct-99)	University of Tennessee
Lee Riedinger (Oct-99, Mar-00, Sep-00 chair)	University of Tennessee
Bradley Sherrill (Oct-99, Mar-00)	Michigan State University
Robert Tribble (Oct-99, Mar-00, Sep-00)	Texas A&M University
Alan Wuosmaa (Oct-99, Mar-00, Sep-00)	Argonne National Laboratory

The PAC reviewed 31 proposals for 155 days of requested running time, 29 proposals for 156 days of running time, and 29 proposals for 179 days of running time at the three meetings, respectively. Of the submitted proposals for the three meetings, the program advisory committee recommended acceptance of 56 proposals for a total of 256 days of running time.

The ATLAS User Executive Committee organized a joint User Group meeting chaired by Jolie Cizewski in conjunction with the Gammasphere and Berkley 88" Cyclotron User Groups during the October 2000 Division of Nuclear Physics APS meeting held at Williamsburg, VA. Approximately 100 scientists attended the meeting. The main topics of discussion concerning Argonne were the status of ATLAS, updates on various experimental programs and issues surrounding Gammasphere. In FY 2000 the ATLAS Executive Committee consisted of Jolie Cizewski (Rutgers University) as Chairperson, Michael Wiescher (University of Notre Dame), Partha Chowdhury (U. Mass Lowell), and Gene Sprouse (SUNY at Stony Brook).

A wide variety of experiments were carried out at ATLAS during the last year, with emphasis placed on utilization of Gammasphere during its tenure at ATLAS. The strength and diversity of the research program at ATLAS continues to rely heavily on active involvement by universities and other institutions.
