Jefferson Laboratory

The JLab Hall-B Physics Program

Host: Whitney Armstrong

Monday, December 9, 2019 – 203, R150, 3:30 PM

Jefferson Lab has fully entered in the 12 GeV era providing high statistics and high quality electron scattering data on the nucleon and nuclei. Hall-B with experiments such as PRad, HPS, and CLAS12, Hall B covers all of JLab's science program in hadron and BSM physics. In this talk the current and future status of the Hall-B programs, as well as some preliminary results will be presented.
